## Software Engineer I

DCI is seeking a self-motivated and customer-focused Software Engineer, to join our successful business and collaborate with some of the best technologists the industry has to offer. The candidate will have a passion for learning, strong technical competence, and ability to work well with our team in a fast pace results driven environment.

## Responsibilities

- Design, develop, and maintain two database software applications, one that helps the Operations team track and maintain financial data and another that helps the Strategic Information team collect health services data from more than 260 users around the world.
- Evaluate, advise, plan, create, monitor, and maintain the applications through their life cycle.
- Collaborate with operations team members to gather user stories for the financial application and assist in documenting programming tasks.
- Develop application code using the Microsoft suite of software, including C#, MVC, Awesome controls, ASP.Net, SQL Server, and related third-party tools: HTML, Javascript, jQuery and Bootstrap.

## Required

- Two to five years of software development experience in .NET and C# in a Microsoft development environment (Visual Studio and TFS).
- Subject matter expertise in Microsoft suite of software and related third-party tools such as Javascript, HTML, jQuery, Bootstrap, MVC.
- Strong experience with relational databases, especially SQL Server, API design and development.
- Robust knowledge about stored procedures, views, joins, inserts, updates and delete processes in SQL.
- Experience with Git source control is desired.
- Demonstrated successful track record in developing software.
- Experience working in an Agile team environment.
- Written and oral proficiency in English with outstanding written and oral communication skills.
- Ability to communicate effectively and accurately with all team members, government officials, and remote team members.
- Prepare documentation and progress reports in a professional and competent manner.
- Minimal domestic and/or international travel may be required.
- Due to Federal regulations, US citizenship (no dual US citizenship) and the ability to obtain a Secret Clearance is required.

## Preferred

- Prior work experience with a government agency or the military.

- Expertise in cloud-based computing applications.

## Education

- Bachelor's degree in a relevant technical field from an accredited college or university is required.

## About DCI

DCI is an Information Technology company, with a focus on simplifying the complexity of cloud adoption, and specializing in cloud security, compliance, and governance for global health, homeland security, and criminal justice information systems.
